

Excursion Week in Computational and Mathematical Modelling

What? Supported by professors and PhD students, you will **work in small teams** of 6 students from different courses of study on **recent research topics** provided by the **Forschungszentrum Jülich**. You will get in touch with current mathematical questions of different **interdisciplinary** research fields. A variety of topics, ranging from machine learning in material science, molecular dynamics and the data fit of gravity waves to image processing, assures that all areas of interest are covered. At the end of the week, the obtained results will be presented.

The CAMMP week Pro provides an interdisciplinary complement to your course of study and grants you insight into the application of mathematical modelling to **highly relevant research topics**. Moreover, it provides the opportunity to arrange student jobs or thesis.

Who? Students with a strong programming and/or mathematical background

When? May 20th – May 24th, 2024.

Where? Simmerath (Eifel) and RWTH Aachen. Transportation and accommodation will be organised centrally.

Costs? 70.00 € (transportation, accommodation, catering in Simmerath, Rurberg).

Registration? Recommended by March 29th, by **April 15th** at the latest (first-come, first-serve)

Mathematics (M.Sc.): Please register on RWTHonline for the “Seminar zur Computergestützten Mathematischen Modellierung” (**5 CP**).

Mathematics (B.Sc.): Please register on RWTHonline for the “Forschungsmodul zur Computergestützten Mathematischen Modellierung” (**3 CP**).

CES (B.Sc. & M.Sc.) and SiSc: Please register on RWTHonline for the “Seminar zur Computergestützten Mathematischen Modellierung”. The CAMMP week Pro will be accredited as a seminar for the M.Sc. (**3 CP**).

Physics, Computer Science, Data Science: Interested students can register via E-mail. Accreditation might be possible.
