

# About ComTrade

[ComTrade](#) Group is one of the leaders in the field of information and telecommunication technologies (ICT) in the region of South Eastern Europe. Over **1.000 software engineers** are working in ComTrade [offices](#) in Slovenia, Serbia, Bosnia and Herzegovina, Ireland, Germany, Austria and USA.

## About the summer school

As every year ComTrade is now organising student summer school [EdIT 2013](#). It is held in most of the major ComTrade offices.

The goal of summer school is to give the students the opportunity to get a feel of work in the real world. The school itself consists of practical work on some application (eta. 60%), team building games and activities (20%) and lectures from IT professionals (20%). The school itself lasts for two weeks (working days only, 8h per day) between **8. – 19.07.2013**.

Due to the ComTrade group expanding to Germany and Austria, we are also inviting students from Germany and Austria to join us on EdIT 2013 in our offices in Ljubljana. That being said, this is a great opportunity for you to gain some experience and maybe even start your career. The chosen language for communication is English.

## This years challenge

**Be smart, be eco.**

Have you ever thought about a smart home and the energy savings involved?

EdIT 2013 with this project offers the challenge for participants to build that home together. An automated home, with the possibility data tracking through a mobile application. To motivate the users for energy saving, the application will reward the users with the title EcoStar.

This years EdIT is following Eco trends and is a special challenge for those interested in embedded systems, android apps and gamification. So join us on EdIT 2013 in Ljubljana!

## What is included?

The school itself is **completely free**. You will also receive a warm lunch, snacks and drinks.

The travel and resitation in Ljubljana is not covered, however there might be an option for couchsurfing at some local students.

## How to apply

You can apply [HERE!](#)
