Conference goals

The Latin America Networking Conference 2005 will provide an international technical forum for experts from industry and academia everywhere in the world, but especially from the Latin American countries, to exchange ideas and present results of ongoing research in networking.

Topics of Interest

Topics include but are not restricted to:

- Low cost access networks
- Sensor and actor networks
- Low rate communications
- National/Regional communication infrastructures
- Wireless and Mobile Networking
- PC Cluster computation
- Applications for productivity
- Internet based applications
- Network management
- Network security
- Optical Networks
- Protocols and routing
- Satellite communication systems
- Next generation Internet and network architectures
- Peer-to-Peer communications
- Photonic networks

Submission of papers that cover solutions of specific network problems of the Latin America region is especially encouraged.
