

RWTH Aachen Summer School July 31 – August 21, 2010

New Summer School courses in 2010

Based on the great success of previous summer programs, *Learn German - experience Aachen* and *German Engineering, Language and Culture (erstwhile KEIO)*, the RWTH Aachen University developed new Summer School courses for 2010:

Automation and Simulation, *Steel Design* and *Automotive and Mobility Studies* are three-week courses for international students who want to take part in excellent science and research in summer next year.

The RWTH International Academy, the International Office and the Language Center of the RWTH Aachen University work closely together with Institutes of RWTH Aachen University to offer the students a perfect mix of technical knowledge and practical, cultural experiences. The involved institutes for our four technical courses are:

- Institute of Automotive Engineering
- Institute for Metallurgy and Materials Engineering
- Institute for Manufacturing Technology
- Institute for General Mechanics

Target group

The main target group for the RWTH Aachen Summer School-program are undergraduate students who get to know Aachen city and RWTH Aachen University first-hand and maybe even to decide to commence their Master studies here. The program is also recommended for students who think about going to Aachen as an exchange student during their studies, but would like to get to know the city and university beforehand. Master students and graduates who want to get to know Aachen and the University are also welcome.

Certificate

At the end of the program, participants will receive an official certificate of RWTH Aachen University stating the contents of the course and where applicable their performance.

German Culture and leisure time

While following an intensive academic program offered by the university's institutes, participants will experience German culture hands-on through an extensive leisure time program. German culture, excursions to companies and cities nearby, sport events, get-

together with international master students who have graduated in Aachen, cultural events, workshops in intercultural communication and a lot more!

If you require any further information, please contact our course managers:
