Conference Chair

David Lassner
University of Hawaii

Sponsorship Co-Chairs

Sharon Nakama
Pacific Telecommunications
Council

Peter Plamandon
Microsoft

IW³C² Liaison to WWW2002

Joseph Hardin
University of Michigan

WWW2002 Conference Partner

International Federation for
Information Processing (IFIP)
Working Group 6.4 on Internet
Applications Engineering

You are cordially invited to participate in the 2002 International World Wide Web Conference (WWW 2002) on May 7–11 in Honolulu, Hawaii. Since the first WWW conference in 1994, this prestigious conference series has brought together technical experts and social engineers to discuss the present and future of the Web throughout the world.

The conference begins with tutorials and workshops on the first day, providing in-depth looks at specific areas of current interest.

The main three-day technical program includes refereed papers, alternate track presentations, plenary sessions, panels and poster sessions describing current work in the lab and in the field. The program also includes a forum for the latest news and views from the World Wide Web Consortium in the W3C Track.

To wrap up the week, Developer's Day provides a forum for in-depth and often highly participatory technical sessions designed specifically for web developers.

REFEREED PAPERS

Topics of interest include but are not limited to:

- ▶ Applications
- ▶ Browsers and User Interfaces
- ▶ Electronic Commerce & Security
- ▶ Hypermedia
- ▶ Languages
- ▶ Mobility and Wireless Access
- ▶ Multimedia
